

The plan of the Empire that reigns over the nations of southern Africa plans the genocide of the Boer nation, in political and spiritual sense. Probably even physically.

It's War...! Blacks don't want whites in townships

Pretoria, South Africa,

18 November 2010

By: J. Mare

The housing crisis in South Africa is now taking on a new dimension. It is well known that there's a backlog in the building of houses for poor black South Africans.

What is not widely known, is the fact that the ANC Governments RACIST policies of Affirmative Action (Job Reservation) and BEE (Black Economic Empowerment) have caused severe POVERTY among AFRIKANERS.

It is estimated that approximately 800,000 AFRIKANERS [other sources say 500,000. Ed.] are living in abject poverty, because of the these policies.

The ANC is now in a predicament.

It will now have to cater for the needs of poor SOUTH AFRICANS from both the BLACK, as well as the WHITE communities. How will they solve the problem when they cannot even provide housing for the electorate, who have voted them into power?

It seems as if the situation is inevitable going to lead to a war over RESOURCES.

Resources that some BLACKS feel, should only be made available to them, as a RIGHT owed to them by the government that promised them houses. They also feel that the mandate given to the government DOES NOT INCLUDE the liberty to uplift the living conditions of POOR AFRIKANERS at the expense of that of BLACKS.

It will be a disgrace if houses were to be made available to whites and have THEM benefit, instead of the hysterically (read historically) disadvantaged BLACK.

Afrikaners therefore have reason to fear being dumped in these squatter camps when the animosity towards their presence is now a well established fact. If one reads the commentary to the article it is VERY clear what blacks feel about this situation.

AFRIKANERS need a place of their own.

We need the freedom to live in peace amongst people of our own culture.

Why is this too much to ask?

===

Whites, blacks fight over RDPs

[RDPs: in this context understood as “social housing”. Ed]

The war between the poor white squatters of Coronation Park and the Kagiso People's Civic Organisation is on

Residents are up in arms over the proposed allocation of houses in the Chief Mogale Housing Project [Mogale City is the name that ANC's regime in southern Africa, also known as "Azania", gave to the town of Krugersdorp. Ed.] in Kagiso to whites.

They say it is unjustified for the municipality to give priority to poor whites by allocating RDP [Reconstruction and Development Programme. Ed.] houses to them ahead of the poor from the township.

"Whites are not welcome in Kagiso. We want proof that they applied (for RDP houses) legitimately. Honestly, we are going to mobilise," the civic organisation's general secretary Luyanda Njomane said.

"Anyway, we were never consulted and it was a shock to us when we read about this in the media."

Coronation Park dwellers have since rejected temporary housing in Munsieville [black township near Krugersdorp. Ed.].

Resident Irene van Niekerk said: "Give us a piece of land and we will move. Black people are going to kill our people (in Kagiso). They say they are going to kill us if we move into the (RDP) houses."
